Senate
State of Minnesota

August 9, 1990

Honorable William K. Reilly
Environmental Protection Agency
401 M Street Southwest
Washington, DC 20460

Dear Mr. Reilly,

I am deeply concerned about the air quality of my state and nation, and feel it is crucial that every effort be made to explore ways to improve air quality.

It has come to my attention that the Environmental Protection Agency is considering permitting a new performance additive known as HiTEC 3000 for use in this country. This additive has been shown to decrease carbon monoxide emissions and a twenty percent decrease in nitrogen oxide.

We need to consider all means to improve air quality on both the state and federal levels. For this reason, it is my hope that the EPA thoroughly examine all options as quickly as possible.

Sincerely,

GREG DAHL
State Senator, District 50
Vice Chair, Senate Environment
and Natural Resources Committee
